

## BTC Wallet Balance Checker - GUI Tool

This tool simulates a balance check for a Bitcoin wallet address in a graphical interface.

### REQUIREMENTS:

- Python 3.9 or newer
- tkinter (comes with Python on Windows)

### USAGE:

1. Open terminal / command prompt
2. Navigate to folder
3. Run:

```
pip install -r requirements.txt
```

```
python btc_checker_gui.py
```

Type a BTC address and click "Scan Wallet". The result will be shown and can be exported as .txt.

This tool works completely offline.
